

January 28, 2018 â€” Pro tools HD 12.8.1, Logic Pro, Ableton, Guitar pro 6, Notion, Amplitube 4, Tracks Live, Melodyne Video/media Editing Software In this note, I want to talk about how I set up my mix file for the sound of a guitar. In order for me to get the desired guitar sound in my mix, I decided to create my own plugin. In order to create the plugin, I used the Ableton Live audio editor. Since I don't want anyone to use my plugin, I decided to make it based on an existing plugin I created earlier. I created my plugin based on the Vocoder by R-Studio plugin.
