Publisher's description When it comes to ensuring a streamlined PC, no task is more significant than the administrative one. Here we are not referring to the tasks that need to be performed 6a5afdab4c

Log executor is a very powerful application that can monitor all the programs that are running on the computer. Log executor can monitor and log programs as well as when they started, if they were running as Windows Service (service task), what were the name and path of the file, how they terminated, how much time they spent before they terminated, in which file the process terminated, etc. Log executor will show all the log files automatically for Windows XP and Windows Vista as well. Log executor can read Windows registry keys as well to

find a lot of useful information about applications. It can monitor not only the Windows application and Windows Service, but it can also monitor almost all the file operations such as when they were created and modified, when they were accessed and from which user. If you want to save log files, you can just set the monitor program to log for each and every 5 minutes or 10 minutes or every hour. If you have Windows XP or Windows Vista, you can use log executor to find out what applications are installed on the Windows computer. You can also log executor to log Internet traffic, if you want to know what websites the

users of your computer have visited. If you want to monitor your banking program, you can log executor to log the files that your banking program opens or the transactions it performs. You can even log executor to make an audit trail of all the files and folder that were opened on your computer in your computer so that you can find out if any of the file was modified. Some users also use it to hide their porn. If you want to know when your computer was turned on or off, you can use log executor to log it. And if you want to log your entire computer usage, you can use it to log when the user enters into the Windows Login

screen and log when the user logs out of the Windows Login screen. If you wish to log executor to log the programs that you run, you can use it to log executor to log the programs that you run on the computer. You can also set log executor to run at regular intervals. You can use log executor to log executor to log executor to log executor to log executor to log executor to log executor to log executor to log the executor to log executor to log the executor to log executor to log the executor to log executor to log the executor to log the executor to log the executor to

What's New In?

Log Executed Programs is a helpful tool allowing you to monitor EXE file executions. It includes several other parameters, such as those related to the program itself and the time it was opened. The program manages to simplify the monitoring process and offer a great set of options. At the same time, it doesn't seem to affect performance and, thanks to its automatic scheduling, will let you save all the information it gathers for you. Being able to log the data is a great thing as you'll be able to have handy reports to analyze at any point. In addition, the application also saves it as text files or Excel documents. It's a truly

useful tool for those interested in keeping track of what their PC is doing. Key Features: • Watchs all currently running EXE file executions • Allows you to save the logs as text or Excel files • Allows you to monitor process creation and termination times • Automatically schedules logs for you • Minimizes to the system tray • Supposedly works well More Free Software:
