AutoCAD Cracked Accounts and Microsoft Office are the two most-used CAD programs. The AutoCAD LT word processor is used to prepare a drawing; the corresponding "Autodesk Showroom" allows graphic and documentation files to be shared through the internet. While AutoCAD is primarily used for CAD, a version of AutoCAD for mechanical design, AutoCAD Mechanical, is also available. AutoCAD is available as a stand-alone application or as a plug-in for

Microsoft Office. Autodesk has also developed a series of mobile apps for iOS, Android, and Windows 8/10. History of AutoCAD AutoCAD is an acronym that stands for "Auto Cad". The original company behind the AutoCAD software was Autodesk, founded in 1979 by Thomas Ball. In January 1982, AutoCAD was released as a product. In December 1982, AutoCAD was released in the U.S. followed by an international version in May 1984. In 1990, AutoCAD was released for Macintosh. A year later, AutoCAD for Windows was

released. The following year, in 1991, AutoCAD NT was released. AutoCAD was originally only available for the PC. In 1999, AutoCAD 2000 was released for Macintosh, allowing users to create 3D modeling and animation and, also, to create animations using the built-in Movie Maker software. In 2002, AutoCAD 2004 was released for Windows; the same year, AutoCAD 2004 for Macintosh was released and AutoCAD Architecture, an architecture-focused version of AutoCAD for the PC, was released. In 2005, AutoCAD

2005 for Windows was released and AutoCAD Architecture 2008 was released. AutoCAD Architecture 2009 was released in 2009. AutoCAD 2010, which features enhanced 2D and 3D modeling capabilities, was released in 2010. AutoCAD 2012, which features a new command-line interface and productivity improvements, was released in 2012. In July 2013, AutoCAD 2013 was released, featuring new cloud-based functionality and extensive enhancements to database management and

text creation. In October 2014, AutoCAD LT 2015 was released with enhanced reading, writing, and formatting capabilities and added support for the new cloud technology.
