Mac mini quad core 1.7ghz 2gb of ram. Dell Optiplex gc. Dell Optiplex dc. Its always nice to have music while gaming. You get to choose the sound quality. I mean the quality of the music. You have a total of 8 presets. However, you are also given the ability to change the midi music as well. But if you are wondering how to get sound effect options while playing a game, there are still options for you. You can download music from their website as well. Now let's talk about the game –

- Volume option – You can control the volume easily in the game. You can either decrease the volume if you want to play with a lower sound quality or you can increase the volume if you want to play with a higher sound quality.
- Midi Music – There is a big green button on the top right corner. If you click on it, you will be taken to the midi music option. There you will find 8 presets. You can play the midi music as you wish to. You can also adjust the sound effects.
- Sound Effects – On the right side of the sound card, you will find some sound effects. If you want to have more of them, you can find the option in the sound effects option. There you can adjust the pitch and the speed of the sound.
- Options – Finally, you will find the options on the left side of the screen. If you click on it, you will be able to view the sound effects, the volume, midi music, and more.
- Exit – If you don't like the options you see, you can simply hit the red button.
- Restart – If you want to restart the game you are playing, simply hit the 'home' button and then hit the 'restart' button.
