Related Games: A: I'm not one to critique games, but I will say this is one of the most unique, interesting, and downright fun games that I have ever played! What I am trying to say is, it's hard to not like it. This is because it is intriguing, entertaining, and fun from beginning to end. Even when some elements have to be made to be entered into the game, there are quite a few that make it fun and also help to create a kind of self-challenge in finding all of the items that are scattered throughout the world. To take a beating and not say anything is not really

fun, and this is what this game tries to do from the very beginning. No matter what village they come from, no matter what weapons they have, or how much they are prepared for, there will always be something new to discover. Not to mention, it's a pretty good simulation of medieval life. I am not sure that I will be able to explain this and the idea behind the game in a nutshell, but the idea behind it is brilliant! [Iz_jqueryui] JQuery UI Drag and Drop I've posted my little library for jQuery drag and drop to the project page. I had created it earlier for a certain project and am building a site that has a lot of drag and drop features so I thought I'd share it. Anyway, this is what I had to say about it: "I've been playing with the awesome jQuery

UI plugin and today I decided to start a blog about my (seemingly never ending) life trying to learn jquery. This plugins is one of the nicer ones I've found and it is really easy to use. The drag and drop events are different from normal ajax, you use the same draggable and droppable features, but instead of sending in the data you change the html in your box. Since I just started reading your blog I don't have enough data to really show you a good example, but I can give you some code. Here it is: It's easy to see that instead of ajax you c9d1549cdd
