Online Full Video.Full Movie I Am Kalam .Automated cell tracking for measuring complete blood counts using the gating strategy of SYTOX Green. The purpose of this study was to develop a novel method to track the blood cells and to automatically measure the complete blood counts (CBC) in the gating strategy of SYTOX Green (SG). The system was developed using a gated blood cell acquisition mode and a flow cytometer equipped with a single laser capable of illuminating the SG-stained sample. The mean signal intensity of SG-stained red blood cells (RBCs) and platelets (PLTs) increased as the fluorescence intensity of cellular components increased from RBCs to PLTs. Since the fluorescence intensity of SG-stained RBCs and PL
