Roblox is a massive multiplayer online game (MMO) created in 2006 by David Baszucki and Erik Cassel, and was initially developed for Microsoft Windows, but was later ported to other platforms. The platform allows users to create and play user-created games in a variety of genres, including RPGs, adventures, obstacle courses, and many others. Built in the programming language Lua, a substantial number of these games are fueled by Roblox's extensive API. Roblox released as free-to-play on August 11, 2008. Originally, the platform was free to download, but this was changed in 2010 when a \$39.99 monthly subscription fee was introduced, which was increased to \$49.99 in 2012. Players also have the option to pay per use, which is preferable for those who play a lot of games. In 2016, Roblox began to offer in-game purchases; players could buy Robux with real money to either play games or purchase additional game content. This was met with criticism, and was eventually removed in 2017. However, Roblox did implement a 99 cents deposit limit that prevents players from spending more than \$2.99 per day, and only allows spending on certain items. This was gradually lifted until, as of the September 2019 update, all in-game purchases were removed. On October 10, 2016, Roblox announced a \$15 million round of funding, and several months later, they announced they had raised \$55 million to fund projects that would grow the site. Roblox raised over \$150 million in 2017 alone. For the first time in their history, Roblox passed \$100 million in revenue in 2019, and hit \$250 million in 2018. In 2017, Roblox launched in China. On May 21, 2019, the Roblox team announced the closure of a portion of the company's service and the deactivation of some features to prepare for a transition to a subscription-based business model with cloud servers, which officially launched in September 2019.
