There is a constant running joke in the commentary regarding the fact that the editing team is constantly in a state of chaos because of the fact that they have 11 minutes of footage to edit into one hour of movie. This is the only commentary track that doesnt have a single story about the making of the movie or behind the scenes of the movie. We do get some commentary on Finchers style, though. For example, he compliments the fact that his characters are almost always wearing business suits and that the whole movie takes place in cool places. There are lots of other interesting observations, too. (P.S. Pictures from the commentary track can be downloaded by clicking on the caption below.)

A mystery man, a murder, and a wad of missing cash in their wryly offbeat breakthrough, Wayne Wang updates the ingredients of classic film noir for the streets of contemporary San Francisco's Chinatown. When their business partner disappears with the money they had planned to use for a cab license, driver Jo (Wood Moy) and his nephew Steve (Marc Hayashi) scour the city's back alleys, waterfronts, and Chinese restaurants to track him down. But what begins as a search for a missing man gradually turns into a far deeper and more elusive investigation into the complexities and contradictions of Chinese American identity. The first feature by an Asian American filmmaker to play widely and get mainstream critical appreciation, *Chan Is Missing* is a continuously fresh and surprising landmark of indie invention that playfully flips decades of cinematic stereotypes on their heads. *Chan Is Missing* stars Marc Hayashi and Josh Gad in this wryly offbeat comedy.
