Have you ever found yourself in a position where there is a small but definite problem with a product - be it a dishwasher or washing machine, a blender or a router, a phone or a computer - that will take some time to get around. You have to wonder why it should matter so much, since they are only one step removed from the market from your corporate image. The other important aspect of the iPad Pro is the price. And to put things in perspective, the base iPad model today is only slightly cheaper at \$549 for two A9X processor models. And at least one of them is clocked at 1.4GHz, versus the A9X's 1.7GHz. So in terms of raw performance, the \$999 iPad Pro is a bit more powerful than the \$999 base MacBook Pro. Surely everyone in the photography industry knows that, right? I mean, every photographer in the industry is just... an iPhone snapper who just happens to love photography. Everyone should know that a full file RAW converter that has professional level controls (like Lightroom) when combined with a tiny mobile computer like the iPad Pro and a dedicated stylus is a thing of beauty. If you've previewed your images in the mobile app and found those images to be looking out of focus, the mobile app enables you to export the selected JPEGs at the highest quality setting. The mobile app enables you to lower the quality of the exported images without losing detail in the image. The built-in smart contrast tool enhances color-dynamic toning.
