Indo Cleaner Crack + For PC [Latest-2022]

Details Indo Cleaner is a lightweight Windows application whose purpose is to help you delete the lists of programs or documents that were last accessed (MRUs). The tool is able to clean many unnecessary and unused files that occupy a lot of space on your computer, and delete Internet browsing data, such as cookies, history, and other items. Straightforward looks The tool offers support for a built-in wizard mode which offers assistance throughout the cleaning process, so even rookies can learn to configure the dedicated parameters with minimal effort. Main features Indo Cleaner gives you the possibility to select the categories that you want to scan before removing data, namely Windows Explorer (e.g. recent documents, Start Menu items), Windows Applets (recent lists in Paint, Wordpad, and Registry Editor), and System (Recycle Bin, Temporary Files, Log Files, Clipboard content). Plus, you may delete Internet Explorer items (e.g. cookies, temporary items, typed URLs) and browsing data for Firefox, as well as wipe out recent lists from Microsoft Office, Macromedia applications (such as Macromedia Flash, Dreamweaver), and Windows Media Player. During our testing we have noticed that Indo Cleaner carries out the scanning process pretty quickly and displays the number of found items for each category. You are allowed to selected the category that you want to delete but you cannot manually view and choose the files from each list. At the end of the cleaning process, you are offered details about the category, number of deleted files, as well as the percentage for the cleaning process. Bottom line All in all, Indo Cleaner seems to be the right choice in case you are looking for a simple-to-use application that comes bundled with only a few functions for helping you clean up your system for recent file lists and browsing data. Review Date Oct. 10, 2011 Overall This product appears to work fine. It has been installed for a couple of years now and does what I need it to do. Review Date Oct. 11, 2012 Overall A powerful and reliable tool. We had a few issues with the latest version, but it's up to date now and keeps working well. Very well worth its price. Review Date Oct. 19, 2012 Overall This is a good tool for cleaning up MRUs. It was able to recognize that we had disabled the

What's New In Indo Cleaner?

Indo Cleaner is an amazing and quick application that will clean your computer of unwanted files. It does not require an uninstall of a lot of other tools. This application has a simple interface and an easy to use wizard which will guide you through the process of removing your unwanted files and cleaning your system. Indo Cleaner is a great tool for you to free up disk space and clean all the information about browsing and Internet usage that might clutter your computer. In addition to the wizard, the application offers four categories to scan: • Recently opened documents • Recently opened programs • Recent start menu items • System The user can view the progress of the cleaning process and monitor the percentage of files scanned and removed for each category. Description: Ccleaner is the most comprehensive file cleaner. It offers an array of powerful tools that will help you remove unwanted data from your computer or smartphone. The application starts scanning the system with two simple steps. First, you have to pick a cleaning mode and select a category that needs to be checked. You may also choose the maximum number of applications that you want to remove from this category. The second step will be a detailed scan of every file that appears on the list. There are three different cleaning modes available: • File cleaning mode: It will scan your file system and delete all the unused files that are not used by your installed applications. • Registry cleaning mode: It will scan and clean the Windows Registry in just a few seconds. • Cleaner Cleaner: It is a specialized option to delete specific items from your computer (e.g. cookies, temporary files, typed URLs, etc.). When the cleaning process is finished, the application will display the number of removed files for each category. Once the program has finished its work, it will automatically delete itself and all the temporary files that were created during the process. Description: SoClean! is a software utility that will help you remove temporary Internet files. It can do so without taking up any additional space. It will erase this Internet browsing data automatically and permanently without any risks of corruption. The program will find the temporary Internet files on your computer. After it has scanned through the list of the files, it will ask you whether you want to delete or move the temporary Internet files. Description: T-Cleaner is a powerful tool that will help you clean temporary Internet files. The utility will scan the Temporary Internet Files folder and delete all temporary Internet files on your computer and thus free up space on your hard drive. Description: This tool will scan your hard drive and will find all temporary Internet files and will delete them. Temporary Internet files occupy an amazing amount of space on your PC, which might cause several problems, such as slow Internet speed. This program will eliminate all these problems by removing all the files that might slow down your connection. Description: Internet Clean
