Site Visualizer Professional Full Product Key

MouseTool is a native tool for Google Chrome and Mozilla Firefox which allows you to quickly access any website and perform a thorough examination of the different elements. Although it was designed for webmasters and SEO professionals it also comes in handy for regular people. Besides browsing a website or webpage the application is able to perform the following tasks: 1. View the Page This feature is great if you're browsing a specific website and want to quickly see what the page looks like. If you have an FTP account, you can quickly open a local copy of the website in your browser of choice and review the source code. Otherwise, you can upload it through the application to review it online. 2. View the Page's Source Code This allows you to see the original code of the page as it would look if you were opening it in a text editor, such as Notepad. This can help you determine what all the code means and find HTML and CSS code that isn't functioning properly. It can also help you identify sections that aren't formatted correctly. 3. Bookmark You can bookmark the current page and use it to return to it later. 4. Screenshot This allows you to take a screenshot of the currently active page. 5. Copy URL This allows you to copy the URL of the current page. 6. See Images You can quickly review the images in the current page. 7. Search You can enter a search term and Google's search engine will do a search based on the text. 8. View in Developers Mode This allows you to view the page in the developers mode so that you can better identify all the HTML elements. 9. Zoom This feature allows you to zoom in and out of the page. 10. View Page History The page history provides a quick and easy way to view the pages visited during the current session. 11. Find All Links You can quickly view all of the links in the current page. 12. Find Next Page You can quickly view the next page in the website's navigation menu. 13. Find Previous Page You can quickly view the previous page in the website's navigation menu. 14. Find Specific Page You can easily identify the specific page by entering its URL. 15. Find By File Type You can quickly review all of the images in the website. 16. Advanced Search You can search for a
