Top Apps App Details UPDATED ON: Oct 17, 2011 SIZE 1,049,927 INSTALLATIONS: 10,000 - 50,000 LATEST VERSION: 1.7.5 REQUIRED ANDROID VERSION: 1.6 and up Permissions SYSTEM TOOLS permanently install software Allows an application to permanently install and run Cyngn.com Content Provider on your Android device, without any user intervention. Giants 101 provides 24/7 obsessive sports coverage of the New York Giants as a part of Sports Media 101. For news, op/ed, game reviews, team updates and even rumors you will find all of it on Giants 101. Have an opinion - join the discussion and drop a comment. If it's about the Giants, it's on Giants 101. Sponsors Fan Poll What is your pick for the offensive rookie of the year? A once daily email with the top 5 most important stories from around Sports Media 101. 3 Responses That said, I never had any doubt they were going to get a running back of the year. This is clearly the biggest issue they have had in the last 5 years, and it has kept their offense from really getting going. Barkley obviously fits that role perfectly. He is not as big or physical as Peterson, but has a lot of the same skills. He has a lot of work to do, but the sky is the limit for him. When he gets his feet wet I think he can be an every down back for this team. The question about taking a receiver is more about the receivers than Giants coaching. A lot of these guys would be good receivers, but even if they were slotted correctly, they would not likely get any extra help from the defense, as Eli has had the last two seasons. This was not an exciting draft for the Giants. Heres why. 1) He already has the size of an

What's New in the?

Able to create Windows installation files Supports 3 Windows versions Can create bootable flash drive, as well as ISO files Supports UEFI/OEM mode Efficient and easy to use Works with all standard Windows versions Able to deploy any Windows installation Edit ISO and DVD files The Win2Flash interface is minimalistic, with just two tabs: * Windows: this tab takes you to the configuration step where you can select between various options, such as the Windows version you want to deploy. * Image: this tab is for the actual write operation, where you select the drive and the letter that corresponds to the flash drive you want to create. You are also able to add custom files, folders, and image types. You can also select "PLAN", which means that you can define custom configurations for Windows. Once the configuration step is completed, the program will start its work, and it will finish in about 5 minutes, depending on the number of files you want to copy. After finishing the operation, Win2Flash will provide you with a detailed report about the operation, including the number of files that were copied and the amount of free space on the target drive. Note: if you run the program as an administrator, it will also prompt you to reboot your computer, as the system files must be updated by Windows. Learn More: About Win2Flash: Win2Flash is an application that can help you create a bootable flash drive containing Windows installation files, making it easy for you to deploy a new copy of the operating system to any computer. Supports DVDs, ISO files or local folders The file source can be either a DVD, an ISO file or a local folder on your hard drive and you are prompted to choose it each time you launch the application. Alternatively, you can select the so-called 'PLAN' mode, which gives you the freedom to choose a custom install.VIM file, useful for deploying multiple images. Please note that the 'ISO' option is only active if you have MagicISO, magicDisc or PowerISO installed on your PC. Supports UEFI mode Win2Flash aims to make your job as easy as possible and therefore, it features a minimalistic interface, with a single window that displays the two steps required in order to generate the bootable drive. Once the source is selected, the focus switches to the first step, where you must select between various configuration options. Win2Flash supports the UEFI standard firmware interface and OEM. The next step requires you to select the DVD drive and the letter that

corresponds to the target flash disk.

System Requirements:

Minimum OS: Windows XP, Vista, 7, or 8 (64-bit) Processor: Dual-core CPU, 2.0 GHz or faster
