- The application can be moved to the taskbar.
- The application can be moved to the dock.
- The application can be moved to the desktop.

### **What's New in the AgataSoft Shutdown Pro?**

AgataSoft Shutdown Pro is an application which allows you to schedule a power management function for your computer. It can be easily used by individuals of any experience level. The interface of the program is clean and intuitive. The tool allows you to power off, restart, log off, suspend or hibernate the system, as well turn off the monitor and set off an alarm clock. So, you can select a timer (countdown, system clock, CPU usage), add multiple tasks, configure CPU settings (e.g. execute action when the user is away from the keyboard) and connect to the local area network. Furthermore, you can specify cleaning actions before turning off the computer (e.g. Recycle Bin, temporary files, recent document links), set up security (e.g. enable remote action, use a password), configure keyboard shortcuts, enable AgataSoft Shutdown Pro to automatically run at system startup and to

minimize on the close button, and others. The program requires a very low amount of system resources, includes daily tips, has a good response time and didn't freeze, crash or pop up errors during our tests. All in all, AgataSoft Shutdown Pro is a very good program for performing computer automatic shutdowns and we strongly recommend it to all users.
