There are of course, a few bugs to work out, mostly in the mobile apps, but the ability to sync my Lightroom database with Android and iOS is a great feature." He also pointed out that "the organization feature is an excellent, and finally, something you don't see today." So far I am not sure how the Jpegs are used as previews when you have the smart previews (DNGs) available. But have to say that I am happy with 5.2 RC although I will say bye-bye to LR the day they make it part of CC.
