Below is my review of Network Animation in conjunction with the South by Southwest (SXSW) convention in Austin, Texas. The reviews were posted by @drlstivansfilter and all images were shot on an iPhone 6+ with the camera app ILike . This review was written by @pincypoodle and all images were imported into No Agenda by @adyoulikeapp on an iPhone 6+ with the app Adyoulike . I am a non-native English speaker and while I tried my best, I am not sure that I did a very good job of conveying my thoughts. Image editing is not a task that artists or designers should consider to be on the same level as writing code. Sometimes, it is better for people who use the program to write a little longer and think more about how a creation may look. The wealth of content is actually staggering. There is an entire art gallery. An online store. A sharing network. Five brushes. A channel. And that's just a snapshot of Photoshop in a regular usage environment. RAW files, PSD and TIF formats are used. All three languages (US, UK and Australian English) are supported. Fonts, colors and effects can be chosen. Step-less retouching is possible, including the option to use the Apple Pencil as a brush. The Adobe Cloud even works without cellular data. Shadow effects, cloning, adjustment layers and selections are present, as are masking tools. There are more than 200 layers. You can duplicate them, move them, stack them and group them. When editing a file, it takes you through a workflow that starts with a Remote app access trace, followed by an image view, and then a document editor.
